## Adding injectable substance and application fields back into your treatment plans:

If your treatment plans containing the Injection and/or application procedure segments were not updated prior to the July 1st deadline, your treatment plans will be missing these fields and they will need to be added back into your treatment plans manually.

You can do this from the EHR by going to settings > my profile > treatment plans > click on the plan that needs to be updated > scroll down to the procedure summary > click on add procedure segments:

Cancel	Treatment Plan	one
IMAGING		
+ Add Imaging Test		
COUNSELING		
Counseling Note	Intralesional Kenalog injections, or ILK injections, help reduce and suppress inflammation to an area of skin through the injection of steroid, through a fine needle. Kenalog, or triamcinolone acetonide, reduces inflammation in cystic acro	e. >

PROCEDURE SUMMARY		
Surgical Scrub	Alcoh	< Io
PROCEDURE DESCRIPTION		

Select the injectable substance field (or application field depending on the plan you are updating:

Cancel	Done
Q	
Biopsy Technique	
Blood Loss	
Complex Repair	
Complications	
Deep Closure	
Depth Level	
Epidermal Closure	
Excised Diameter	
Flap Туре	
Hemostasis	
Histological Stain	
Indications	
Injectable Substance	✓
Injection	
Instructions for Pathologist	
Laser	
Marnine	

Search for the medication you would like to add:

•••	<ul> <li>Screenshot 2024-07-0</li> </ul>	98 at 10.52.45 PM		j Q	€ Ĥ	<u>Ø</u> -		Q~ Search	
•••									
Κ				Injectable Subst	ance				(i) 📖
Q Kenalog 10	K								0
			All	Muscle Relaxer	s	Fillers			
KENALOG-10 50 MG NDC 00003-0494-20	/5 ML VIAL	You can use the medication name, or your practice. Or your	search bar to seach by by the NDC number used at iu can select a medication					You can also use the scanning opti the code on the outer box of your n	on to scan nedication
KENALOG-10 50 MG NDC 50090-0295-01	/5 ML VIAL	from th	e suggest list						

Once selected, add your dilution (where applicable) and double-check that your JCode pulled in:

Cancel	Injectable Substance	Done
SUBSTANCE		
Name		KENALOG-10 50 MG/5 ML VIAL (00003-0494-20) >
Multi-Dose Vial		
VIAL		
LOT Number		
Expiration Date		
PROCEDURE		
CPT Code	The JCode should automatically be added when you select your medication, you can manually add it if it does not populate	J3301 >
Dilution	You will need to add your dilutions where applicable	2.5 mg/mL 🚫
Unit		mL
Injected Amount		
Note		

\*\*Please note that if these fields are not added back into your treatment plans, you will not have the injected or applied medications in your note, and it will not generate JCodes for billing\*\* If you previously had "workaround" plans that used the application field to pull in additional CPT codes, you will need to add the application field back into your treatment plan > then manually add the code back in the CPT code section. (In these types of plans you will not have anything in the substance section:

•••	
Cancel	Application Done
SUBSTANCE	
Name	>
Multi-Dose Vial	
ViaL	
LOT Number	
Expiration Date	
PROCEDURE	
CPT Code	Q4159 >
Unit	units
Amount	0

You will also need to update the injectable substance field for your cosmetic injectables. While this is not needed to pull in JCodes, they need to be updated to the new injectable substance field in order for the substance to show in your note:

•••		
Cancel	Injectable Substance Done	÷
