

Most common plans to customize

General information

Add consents to all plans that require a patient to sign a consent whether you customize or not.

Biopsy plan R/O BCC Please make sure a biopsy consent is attached. Please add the appropriate DDX of BCC. Please make sure counseling reads how you would like, another suggestion is adding the biopsy instructions in the counseling section that can be printed and given to the patient.

Biopsy plan R/O SCC Please make sure a biopsy consent is attached. Please add the appropriate DDX of SCC. Please make sure counseling reads how you would like, another suggestion is adding the biopsy instructions in the counseling section that can be printed and given to the patient.

Biopsy R/O Dysplastic Nevus Please make sure a biopsy consent is attached. Please add the appropriate DDX of dysplastic nevus or atypical nevus. Please make sure counseling reads how you would like, another suggestion is adding the biopsy instructions in the counseling section that can be printed and given to the patient.

Punch biopsy treatment plan: Please make sure a biopsy consent is attached. Please add the appropriate DDX. Please make sure counseling reads how you would like, another suggestion is adding the biopsy instructions in the counseling section that can be printed and given to the patient. Under the procedure summary, make sure you set the biopsy technique as “punch biopsy”

Scattered seborrheic keratosis area selection for your FBSE exams, please add counseling notes.

Seborrheic keratosis point selection for FBSE exams.

AK point selection option- Please make sure a cryosurgery consent is attached to this plan.

AK area selection option- Please make sure a cryosurgery consent is attached to this plan.

Atopic Dermatitis- Please make sure you add your most commonly used therapies for this plan.

Mild, moderate, severe acne- These three plans require more detail such as therapies, please add labs you usually want acne patients to have. Please make sure the counseling reads as you'd like some physicians like to add a skincare routine they recommend for acne patients under the counseling section. Please add follow-ups if you usually have follow-ups for acne patients that will then carry over anytime the plan is used.

Isotretinoin for male and female treatment plans- Please add labs you usually want acne patients to have. Please make sure the counseling reads as you'd like. Please all add follow-ups if you usually have follow-ups for acne patients that will then carry over anytime the plan is used.
