

## How to connect QL brother printer [\(video for mac/iPads/Iphone\)](#)

### Connect using a wireless router/access point (Infrastructure mode)

If you have a wireless router/access point, do the following:  
(e.g. QL-820NWB)

1. Connect your printer to your wireless router/access point.
2. Connect your mobile device to the same wireless router/access point. (You can skip this step if your device is already connected to a Wi-Fi® network.)
3. You can now print from your mobile device wirelessly.

### Connect using a wireless router/access point (WPS)

If your wireless router/access point supports WPS (Wi-Fi Protected Setup™), do the following:

1. First, confirm that your wireless router/access point has the WPS symbol, and place the printer close to the wireless router/access point.

2. Turn on the printer.
  - QL-810W: Press and hold the [WPS] button for one second.
  - QL-820NWB: Press the [Menu] button and the [▼] button to select the [WLAN] menu, and then press the [OK] button. Press the [▼] button to select the [WPS Button Push] menu, and then press the [OK] button.

3. Press the WPS button on your WLAN router/access point.
4. When the connection is established, the Wi-Fi (📶) LED is lit blue or the WLAN (📶) icon appears on the LCD.  
If you cannot connect using a wireless router/access point using your computer:  
Connect the printer and the wireless router/access point using your computer.  
Go to "[Connect the printer to the wireless router/access point using your computer](#)".
5. Connect your mobile device to the wireless router/access point. (You can skip this step if your device is already connected to a Wi-Fi network. Go to [Step 6](#).)
  - a. Tap [Settings] - [Wi-Fi] on the mobile device, and slide the toggle button to activate the Wi-Fi function.
  - b. Select the SSID (Network Name) of the wireless router/access point that you connected to in step 4, and then enter the password. The connection between your mobile device and the wireless router/access point will be established.
6. Start the application on your mobile device, and tap the settings icon.
7. Select the printer from the list.
8. You can now print from your mobile device wirelessly.

### Connect the printer to the wireless router/access point using your computer

(e.g. QL-820NWB)

1. Connect your computer to your wireless router/access point.
2. Connect your printer to the same wireless router/access point.
3. Connect your printer and computer.
4. Connect your mobile device to the same wireless router/access point. (You can skip this step if your device is already connected to a Wi-Fi network.)
5. Connect your mobile device and printer.
