

MIPS & MVP Pathway Measures Documentation Guide: 2026

Purpose: This quick reference guide is designed for practices using Ezderm to document MIPS and MVP quality measures accurately for the 2026 performance year

Disclaimer: These workflows reflect Ezderm-recommended best practices aligned with 2026 CMS specifications. Final performance scores and incentive payments are determined solely by CMS.

PLEASE NOTE: To ensure accurate data capture for reporting, you must click into the 'Red M' (Quality Wizard) and document the appropriate response for each measure you are reporting on.

Measure #	Name	Type	*MVP Eligible?	Criteria + Red M Trigger	Frequency	Documentation Steps + Recommendations	Key Action	Met When...
*47	Advance Care Plan (ACP)	Process High Priority	Yes	65+ with qualifying E/M	Annual	1. History > Advanced Healthcare Directive 2. Answer Y/N 3. Add surrogate name in Notes field	Document ACP + surrogate name If no surrogate, enter "no surrogate identified"	ACP response + surrogate documented
130	Documentation of Current Medications	Process High Priority	No	18+ with qualifying E/M	Every Visit	1. History > Dispense Meds 2. Add Treatment Plan (search 130)	Med Hx Consent signed	Name, dose, route, frequency documented
*226	Tobacco Use Screening	Process	Yes	12+ with qualifying E/M	Annual	1. History > Smoking Status 2. Add Treatment Plan (search 226)	Screen + documented verbal counseling	Non-user or smoker with counseling
*176	TB Screening for Biologic Therapy	Process	Yes	18+ with qualifying E/M New biologic Rx (no biologic in past 15 months)	Annual	1. Document results in Progress Note 2. Add Treatment Plan (search 176)	TB test should be documented before biologic rx is sent	TB test type, date, result documented
317	Preventive Care: BP	Process	No	18+ with qualifying E/M No HTN dx No BP Meds	Every visit	1. Document BP reading in Vitals section 2. Add Treatment Plan (search 317) 3. Send Referral Letter to PCP for elevated BP	Document BP in Vitals + follow-up plan	Normal BP or elevated BP + plan
374	Closing the Referral Loop	Process High Priority	No	All patients with qualifying E/M	Annual until Nov 30	Sent and received referral letter(s) added to patient documents		
*410	Psoriasis: Clinical Response to Systemic Therapy	Outcome High Priority	Yes	All patients with qualifying E/M Dx L40.0 Applicable medication	Annual	1. Add Treatment Plan with dx of L40.0 2. Document BSA, PASI, PGA/IGA	In the A+P, click the 3 dots in top right > add Clinical Scores	Approved score + benchmark met
*485/486	Patient-Reported Itch Improvement	Outcome High Priority	Yes	8+ with qualifying E/M Dx of Psoriasis or Atopic Dermatitis	Baseline + follow-up visit(s)	1. Add Treatment Plan with applicable dx 2. Must use Pruritis Itch Scale	Document no improvement in Red M at baseline visit	Document ≥3-point improvement at subsequent visit
355	Unplanned Reoperation	Outcome High Priority	No	18+ with qualifying CPT	Per procedure	1. Add Treatment Plan of qualifying CPT code 2. Select 'No reoperation' in MACRA Wizard	If unplanned reoperation occurs, change your initial answer to 'YES' in Red M	No reoperation within 30 days
357	Surgical Site Infection (SSI)	Outcome High Priority	No	18+ with qualifying CPT	Per procedure	1. Add Treatment Plan of qualifying CPT code 2. Select 'No SSI' in MACRA Wizard	If SSI occurs, change your initial answer to 'YES' in Red M	No SSI within 30 days
358	Surgical Risk Assessment	Process High Priority	No	18+ with qualifying CPT	Per procedure	1. Add Treatment Plan with qualifying CPT code 2. Documentation of surgical risk calculator used 3. Assessment added to pt chart	Use ACS Risk Calculator	Risk + communication documented
*509	Melanoma Recurrence Evaluation	Process High Priority	Yes	All patients with qualifying E/M Melanoma dx + excision in last 5 years	Annual	1. Add Treatment Plan for Hx of MM or MM in situ 2. Change impression to approved ICD-10	Clinician that performed excision must also sign recurrence exam	Exam documented
